

Midwest Topology Seminar

Saturday, February 19, 1994

Northwestern University

- 10:00 am Chuck McGibbon
The Mislin genus of a nilpotent space
- 11:30 am Chun-Nip Lee
Approximation of classifying spaces and applications
- 2:30 pm John Martino
A generalization of Swan's Theorem
- 4:00 pm Randy McCarthy
Calculus of homotopy functors and algebraic K-theory

All talks will be in Swift 107. Swift is the building closer to the lake behind the Mathematics building, Lunt Hall. Lunt Hall has a Sheridan Rd address of 2033 Sheridan Rd. Coffee will be served before the talks starting at 9 am.

There will be a party after the last talk. The arrangements are not final and will be announced at the meeting.
