

Winter Midwest Topology Seminar
Northwestern University
January 25, 1997

9:30 am Coffee and Donuts

10:00 am Ezra Getzler (Northwestern University)
Intersection theory in moduli spaces of pointed elliptic curves

11:30 am Mike Slack (Western Michigan University)
Explorations into the adjointness of loops and suspensions

2:30 pm Nick Kuhn (University of Virginia)
Looking back 20 years: Brown-Gitler spectra and Mahowald's construction

4:00 pm Bill Dwyer (University of Notre Dame)
The undiscovered cohomology of $GL_n(\mathbb{Z}[1/2])$

5:00 pm Party at the Friedlander's.

All talks will be in Swift Hall which is directly East of Lunt Hall. The Mathematics Department is in Lunt Hall. The coffee and Donuts will be in Swift Hall lobby.

****Note change**** The party will be the Friedlander's home; maps will be available at the seminar.

For Hotel information contact Melanie Rubin (melanie@math.nwu.edu) or (847)491 8035.
