

**MIDWEST TOPOLOGY SEMINAR**  
**(second announcement)**  
**January 24, 1998**

9:30-10:00AM Coffee

10:00-11:00 John Palmieri, University of Notre Dame

Title: *Stable homotopy over a  $p$ -group*

11:30-12:30 Igor Kriz, University of Michigan

Title: *Toward a geometric construction of elliptic cohomology*

Lunch

2:30-3:30 Ian Hambleton, McMasters University

Title: *Controlled topology, class numbers, and non-linear similarity*

4:00-5:00 Vladimir Voevodsky, Northwestern University

Title: *Classifying spaces of finite groups from algebro-geometrical point of view*

Party 5:30

All talks will be in Coon Forum located in Leverone Building immediately south of Lunt Building, the Math Department. For more information contact Stewart Priddy, [priddy@math.nwu.edu](mailto:priddy@math.nwu.edu) or Mark Mahowald, [mark@math.nwu.edu](mailto:mark@math.nwu.edu).
